WORK EXPERIENCE

IT Support Engineer

MITRE Corporation

2022 - current / Bedford, MA

- Spearheaded the use of ServiceNow to manage and resolve tickets, maintaining a customer service rating of 9.8 out of 10 among internal users
- Strengthened network security by introducing Windows Defender antivirus software, reducing malware incidents by 66%
- Conducted network analysis using Wireshark, identifying and resolving bandwidth bottlenecks, increasing network performance by 33%
- Streamlined use of AnyDesk remote desktop software, facilitating seamless remote assistance for employees and reducing downtime by two hours per week

Systems Administrator

The TJX Companies, Inc.

2019 - 2022 / Framingham, MA

- Upgraded Windows operating systems on 468 devices, boosting security features and reducing vulnerability risks by 32%
- Authored detailed documentation for Traceroute troubleshooting procedures, increasing efficiency in diagnosing network connectivity issues by 38%
- Leveraged Freshdesk integrations to boost agent productivity, boosting a daily increase of 54 additional tickets resolved per agent
- Negotiated vendor contracts for IT equipment procurement, driving cost savings of $134K per year while ensuring quality standards were met

Help Desk Technician

Massachusetts General Hospital

2016 - 2019 / Boston, MA

- Monitored server performance using SolarWinds, preemptively identifying and resolving potential issues, and reducing system outages by 27%
- Implemented automated system checks using Memtest86, decreasing hardware failure rates by 21% through proactive maintenance
- Trained 36 hospital staff members on Microsoft Teams functionalities, reducing communication errors by 52% and saving four hours per week in clarifications and follow-ups
- Assisted in deploying and configuring electronic health record systems, improving patient data accessibility, and reducing administrative errors by 31%
