## EDUCATION

B.S.
Computer Science
University of Pittsburgh
September 2015 - April 2019
Pittsburgh, PA

## SKILLS

Python
Java
SQL
REST API Development
Analytical Problem Solving
Technical Documentation
Agile Development Practices

## WORK EXPERIENCE

### Software Engineer

Embark

January 2022 - current / New York, NY

- Architected backend services supporting vehicle logistics workflows, enabling dispatch systems to process ~12k shipment events per day with reliable status synchronization.
- Optimized route-planning queries in a microservices environment using Python and PostgreSQL, ***reducing average API response time*** by 38% during peak operations.
- Implemented automated validation checks across shipment ingestion pipelines, improving operational data accuracy across 5 core internal systems used by dispatch teams.
- Partnered with product and operations stakeholders to ship incremental platform releases on a bi-weekly cadence, accelerating delivery of new carrier integration features.

### Software Engineer

MarketSmart

April 2019 - January 2022 / Washington, DC

- Developed new lead-scoring features for a marketing analytics platform, increasing predictive model precision by 21% for donor engagement campaigns.
- Refactored legacy data processing modules into modular services, ***decreasing average batch processing time*** by 17 minutes per run.
- Integrated REST APIs connecting CRM systems and campaign analytics tools, supporting data exchange across 3 enterprise client platforms.
- Collaborated with data science and product teams to deploy experimentation pipelines that supported dozens of A/B campaign tests annually.

### Software Engineer Intern

Marketing Science Company

April 2018 - March 2019 / Pittsburgh, PA

- Built internal dashboards to visualize campaign performance metrics, enabling analysts to monitor 150+ active advertising experiments.
- Automated recurring data preparation tasks in Python, ***reducing manual analyst workload*** by ~6 hours per week.
- Investigated anomalies in digital campaign reporting pipelines, resolving discrepancies affecting three client reporting workflows.
- Documented ETL processes and onboarding guides that shortened ramp-up time for incoming interns by one training session.
