CAREER OBJECTIVE

Throughout my 5-year career as a software developer, I have focused on developing scalable and well-documented code. I enjoy working collaboratively but can also run with projects independently. Excited about the prospect of joining a product-driven company like Acme Corp.

EDUCATION

Bachelor of Science
Computer Science
University of Delaware
August 2016 - May 2020
Newark, DE

SKILLS

JavaScript / React
Java
SQL
REST API Integration
Technical Troubleshooting
Cross-functional Collaboration
Problem Solving

WORK EXPERIENCE

Software Developer

QuickBooks

March 2023 - current / New York, NY

- Engineered backend services supporting invoicing and transaction workflows, enabling accounting APIs to handle ~8k daily financial events without service degradation.
- Optimized database queries using SQL across billing and reconciliation modules, ***reducing average report generation time*** by 34% for small-business users.
- Implemented automated test coverage within the build pipeline using Java, increasing unit test coverage to 82% and strengthening release reliability.
- Coordinated with product managers and QA teams to deliver iterative feature updates on a two-week sprint cadence, accelerating rollout of expense-tracking enhancements.

Front-End Developer

AMR

July 2021 - March 2023 / New York, NY

- Developed responsive user interfaces for marketing and client portals using React, ***improving average page load performance*** by 1.6 seconds across major landing pages.
- Redesigned UI components for campaign management dashboards, enabling marketers to manage 120+ active campaigns through a streamlined workflow.
- Integrated RESTful APIs into interactive dashboards, ensuring accurate real-time reporting for campaign engagement metrics across 3 internal tools.
- Collaborated with design and backend teams to ship accessibility improvements that raised usability evaluation scores to 4.6 / 5 during internal testing.

Help Desk Analyst

Kelly

June 2020 - July 2021 / New York, NY

- Resolved technical support requests involving workstation configuration, software access, and network connectivity, maintaining 95% first-contact resolution for employee tickets.
- Diagnosed recurring system issues across Windows environments, ***decreasing average troubleshooting time*** by 18 minutes per ticket.
- Maintained internal knowledge base documentation covering common support procedures, supporting onboarding for 7 new support staff members.
- Assisted employees with account provisioning and system access requests, handling ~45 service tickets weekly while meeting SLA response targets.
