EDUCATION

Bachelor of Science
Computer Science
University of Washington
2021 - 2025
Seattle, WA

SKILLS

- Python
- Java
- Git / Version Control
- Linux System Administration
- Analytical Problem Solving
- Technical Documentation
- Team Collaboration
- Cybersecurity Awareness

WORK EXPERIENCE

Software Engineer Intern

F5 Networks
2025 - current Seattle, WA

- Developed internal tools supporting network traffic analysis, enabling engineers to review 120+ application request logs daily during testing cycles.
- Automated log parsing and reporting scripts in Python, ***reducing manual diagnostic work by ~4 hours per week*** for the QA team.
- Tested configuration changes across 3 application delivery modules, identifying edge-case failures before deployment to staging environments.
- Documented setup procedures and debugging workflows that shortened onboarding time for incoming interns by one training session.

PROJECTS

CodeIt

Team Member
2024

- Built core application features for a collaborative coding project, enabling management of 4 functional modules including user authentication and task tracking.
- Implemented version control workflows using Git, coordinating code contributions across multiple teammates while minimizing merge conflicts.
- Developed backend logic in Java to support task processing and user input validation during project demonstrations.
- Presented project functionality and technical architecture during semester-end demonstrations, ***communicating design decisions and implementation trade-offs***.

CyberGuard Workshop

Workshop Attendee
2023

- Participated in hands-on cybersecurity exercises focused on network threat identification and vulnerability analysis across 6 simulated attack scenarios.
- Analyzed system logs and traffic patterns to identify suspicious activity, ***reducing average detection time to under 7 minutes*** per exercise.
- Configured basic firewall and access control policies in a lab environment using Linux, strengthening understanding of defensive security practices.
- Compiled post-workshop notes and security recommendations that supported monthly knowledge-sharing sessions within the student technology group.
