Gaia Park

Principal Software Engineer

gaia.park@email.com (123) 456-7890 Redmond, WA LinkedIn

WORK EXPERIENCE

Microsoft - Principal Software Engineer

October 2023 - current Redmond, WA

- Architected distributed backend services supporting large-scale cloud applications, enabling internal systems to process ~22k service events daily across multiple product teams.
- Optimized high-throughput service components in C#, ***reducing average request latency by 41%*** during peak platform utilization.
- Established automated reliability testing frameworks integrated into CI pipelines, strengthening release validation across 12 core platform modules.
- Directed engineering initiatives across 3 teams, collaborating with product and infrastructure leaders to meet 100% of quarterly platform roadmap milestones.

3D Robotics - Software Tester

August 2020 - August 2023 Berkeley, CA

- Executed functional and integration tests for drone control software, validating performance across 15+ flight simulation scenarios prior to hardware deployment.
- Identified defects in navigation and telemetry modules, reducing average bug resolution turnaround by 28% through detailed issue reporting.
- Automated regression test routines using Python, ***cutting manual validation time by 19 hours*** per release cycle.
- Collaborated with firmware engineers and QA teams to improve release readiness, increasing internal quality evaluation scores to 4.5 / 5.

Aduro Biotech - Junior Software Developer

June 2017 - July 2020 Berkeley, CA

- Developed internal tools supporting laboratory data tracking and reporting, enabling researchers to manage 130+ experimental data entries across project workflows.
- Refactored backend logic in Java, ***reducing report generation time by 17 minutes*** per dataset analysis.
- Integrated database queries and service endpoints across 3 internal research applications used by scientific teams.
- Documented development workflows and deployment steps that shortened onboarding time for new engineers by one training cycle.

EDUCATION

University of California, Berkeley - B.S., Electrical Engineering

2013 - 2017 Berkeley, CA

SKILLS

C#; Java; Python; Distributed Systems Development; Technical Leadership; Cross-Team Collaboration; Analytical Problem Solving; Technical Documentation
