WORK EXPERIENCE

Staff Software Engineer

McKesson Corporation

2022 - current Alpharetta, GA

- Architected scalable backend services supporting healthcare distribution platforms, enabling processing of ~18k order and inventory events daily across enterprise systems.
- Optimized transaction processing workflows in Java, ***reducing average service latency by 35%*** during peak pharmacy ordering periods.
- Established automated quality checks within CI pipelines, improving release readiness across 10 critical service modules prior to production deployment.
- Collaborated with product and infrastructure leaders on 5 major engineering initiatives, ensuring timely feature delivery in line with quarterly roadmap milestones.

Associate Software Developer

InComm

2019 - 2022 Atlanta, GA

- Developed backend components supporting prepaid payment processing platforms, enabling management of 160+ daily transaction batches across retail partners.
- Refactored service logic in C#, ***shortening settlement processing time by 23 minutes*** per batch cycle.
- Integrated API endpoints connecting internal services with 3 external payment network systems used by partner retailers.
- Collaborated with QA and product teams to deliver platform updates that improved internal usability feedback to 4.5 / 5.

Technical Support Analyst

Cox Communications

2017 - 2019 Atlanta, GA

- Resolved customer connectivity issues involving internet services, modems, and router configurations, maintaining 92% first-contact resolution for support requests.
- Diagnosed recurring network performance problems across residential systems, ***reducing average troubleshooting time by 18 minutes*** per ticket.
- Maintained technical documentation and troubleshooting guides used by 7 support team members during onboarding and daily operations.
- Assisted customers with service activation and account configuration, managing ~50 support cases weekly while meeting SLA response targets.
