EDUCATION

Bachelor of Science
Computer Science

University of Washington

2014 - 2018
Seattle, WA

SKILLS

- Java
- Python
- REST API Development
- Distributed Systems
- Cross-Functional Collaboration
- Analytical Problem Solving
- Agile Development
- Technical Documentation

WORK EXPERIENCE

FAANG Software Engineer

Google

2023 - current Seattle, WA

- Architected scalable backend services supporting large-scale platform features, enabling systems to process ~21k service events daily across distributed infrastructure.
- Optimized high-throughput request handling in Java, ***reducing average API response latency by 39%*** during peak platform utilization.
- Implemented automated reliability checks across 10 microservice components, strengthening data consistency and release stability.
- Collaborated with product and infrastructure teams to implement a new feature that reduced deployment time by 20% within a two-week sprint cadence.

Junior Software Engineer

Expedia Group

2019 - 2023 Seattle, WA

- Developed backend features supporting hotel booking and reservation workflows, enabling management of 130+ booking transactions per hour across travel platforms.
- Refactored service logic in Python, ***shortening booking confirmation processing time by 17 minutes*** per batch cycle during peak demand periods.
- Integrated RESTful APIs connecting booking systems with 3 partner travel data services used for inventory updates.
- Partnered with QA and product teams to release platform updates that improved internal usability scores to 4.5 / 5 during testing cycles.

Intern Software Engineer

T-Mobile USA

2018 - 2019 Seattle, WA

- Built internal dashboards to monitor telecom service performance, enabling engineers to track 120+ network performance metrics in real time.
- Automated recurring data preparation scripts in Python, ***reducing manual reporting workload by ~5 hours weekly*** for analytics teams.
- Investigated inconsistencies in network telemetry pipelines, resolving issues affecting three regional monitoring feeds.
- Documented development workflows and deployment steps that shortened onboarding time for new interns by one training session.
