WORK EXPERIENCE

Fast - Senior Software Engineer

October 2022 - current Seattle, WA

- Architected core checkout services handling payment authorization and order validation, supporting ~9k checkout requests daily across partner merchant platforms.
- Streamlined authentication and session management logic in Go, reducing average checkout completion latency by 41% during peak traffic periods.
- Implemented reliability safeguards for payment processing workflows, ***decreasing transaction retry incidents*** across 6 critical service endpoints.
- Guided cross-team feature delivery with product and infrastructure engineers on a two-week sprint cadence, enabling faster rollout of merchant onboarding capabilities.

Adaptiva - Software Engineer

May 2015 - October 2022 Seattle, WA

- Developed backend components for endpoint patch distribution systems, enabling secure delivery of updates to 30k+ managed devices across enterprise clients.
- Refactored deployment orchestration services in C#, ***shortening average patch rollout duration*** by 27 minutes per update cycle.
- Integrated monitoring hooks and logging pipelines that surfaced configuration anomalies across 4 internal platform modules used by IT administrators.
- Collaborated with QA and product teams to ship configuration management improvements that lifted customer platform satisfaction scores to 4.5 / 5.

Expedia Group - Software Engineer Intern

May 2014 - May 2015 Seattle, WA

- Built internal dashboards to track travel inventory and booking performance, enabling analysts to monitor 140+ active hotel listings across regional markets.
- Automated data transformation scripts in Python, cutting manual reporting preparation by ~5 hours per week for the analytics team.
- Investigated discrepancies in booking data pipelines, ***resolving issues affecting three partner integration feeds*** used for inventory updates.
- Documented onboarding and deployment procedures that reduced ramp-up time for new engineering interns by one training cycle.

EDUCATION

University of Washington - B.S., Computer Science

August 2010 - May 2014 Seattle, WA

SKILLS

- Go, C#, Python, REST API Development,
- System Design, Cross-functional Collaboration, Analytical Problem Solving, Agile Development
