EDUCATION

B.S. Electrical Engineering (Power Systems Track)
Electrical Engineering
Bataan Peninsula State University
2012 - 2017
Bataan, PH

SKILLS

- Power Plant Operations
- DCS
- Turbine Maintenance
- NERC Standards
- Relay Protection
- Load Dispatch

WORK EXPERIENCE

Power Plant Engineer

GNPower Dinginin Ltd.

Mar 2020 - current Mariveles, Bataan, PH

- Monitored and operated 668MW coal-fired power plant DCS during rotating shift operations.
- Led turbine major inspection team completing 4-week overhaul 3 days ahead of schedule.
- Reduced auxiliary power consumption by 5% through operational parameter optimization.

Electrical Engineer

First Gen Corporation

Jul 2017 - Feb 2020 Fort Bonifacio, Taguig, PH

- Monitored gas turbine generator operations at a 500MW combined-cycle power plant
- Performed relay protection setting calculations for generator and transformer protection schemes.
- Coordinated scheduled maintenance outages minimizing impact on grid dispatch commitments.

Power Engineering Intern

National Power Corporation

Jan 2017 - May 2017 Quezon City, PH

- Observed daily load dispatch operations at the NPC Luzon Grid Control Center.
- Assisted engineers in reviewing transmission line protection relay calibration records.
- Compiled generator availability reports for 8 NPC hydro and thermal power plants.
