EDUCATION

Bachelor of Science in Electrical Engineering

Electrical Engineering

Holy Angel University

2013 - 2018

Pampanga, PH

SKILLS

- Load Flow Analysis
- Power System Planning
- PSS/E
- Transmission Line Design
- ROW Management
- NERC

WORK EXPERIENCE

Transmission Planning Engineer

National Grid Corporation of the Philippines

February 2021 - current Quezon City, PH

- Developed transmission network expansion plans for Luzon grid load growth from 2025 to 2030.
- Conducted N-1 contingency analysis for 8 proposed 230kV transmission line projects.
- Prepared grid impact studies for 5 renewable energy plant interconnection applications.

Transmission Line Engineer

First Balfour Inc.

June 2018 - January 2021 Makati, PH

- Supervised construction of 45km of 138kV double-circuit transmission line in Central Luzon.
- Coordinated ROW acquisition and permitting for 3 transmission line projects across 4 provinces.
- Managed tower erection and stringing activities completing project 2 months ahead of schedule.

Power Engineering Intern

National Electrification Administration

January 2018 - May 2018 Quezon City, PH

- Assisted in reviewing rural electrification project proposals submitted by electric cooperatives.
- Observed energization and acceptance testing of a new 69kV substation in Nueva Ecija.
- Compiled transmission line inspection reports for 3 NEA-monitored distribution cooperatives.
