- Fatigue Analysis

WORK EXPERIENCE

Offshore Structural Engineer

TechnipFMC Philippines

Jan 2022 - current Makati, PH

- Performed in-place and in-service structural analyses for 3 offshore jacket platforms in the Philippines.
- Conducted fatigue analysis and corrosion allowance assessments per API RP 2A standards.
- Prepared structural engineering deliverables including drawings, calculations, and material takeoffs.

Structural Engineer

AECOM Philippines

Aug 2019 - Dec 2021 Makati, PH

- Designed steel and concrete structures for 4 port infrastructure and jetty projects.
- Reviewed and commented on 300+ contractor structural drawings during construction phase.
- Coordinated with marine and geotechnical disciplines on pile foundation design for 2 offshore terminals.

Structural Engineering Intern

Philippine Ports Authority

Jan 2019 - May 2019 Manila, PH

- Assisted in visual inspection of quay walls and fender systems at Manila North Harbor.
- Compiled structural inspection findings into condition assessment reports for 3 port facilities.
- Observed pile integrity testing procedures for a new pier construction project.
