Work Experience

Embedded Logic Labs – Firmware Engineer — Cebu City, Philippines

2021 - current

- Developed low-level firmware for embedded devices and communication modules.
- Optimized memory usage and system performance for real-time applications.
- Collaborated with hardware teams to validate firmware functionality and device compatibility.

TechCircuit Innovations – Junior Embedded Developer — Mandaue, Philippines

2018 - 2021

- Assisted in debugging embedded systems and firmware components.
- Maintained firmware testing documentation and version control repositories.
- Supported deployment and hardware integration testing activities.

Education

University of San Carlos – Bachelor of Science in Computer Science, Computer Science — Cebu City, Philippines

2014 - 2018

Skills

- Firmware Development
- C
- RTOS
- Microcontrollers
- I2C
- UART
- Git
