Daniel Navarro

Protection Relay Engineer

dnavarro@email.com (63) 917-999-0000 Cavite, Philippines

Protection relay engineer specializing in system protection, fault analysis, and relay coordination for high-voltage networks. Experienced in ensuring grid stability and fast fault isolation.

WORK EXPERIENCE

NGCP - Protection Relay Engineer — Cavite, Philippines

Jan 2020 - Jan 2026

- Configured and tested protection relays for 230kV substations.
- Reduced fault clearance time by 22% through relay coordination.
- Conducted system protection studies using ETAP.

First Gen Corporation - Electrical Protection Engineer — Batangas, Philippines

Jan 2018 - Dec 2019

- Performed relay testing and commissioning.
- Assisted in fault analysis and system studies.
- Supported maintenance of protection systems.

EDUCATION

Technological Institute of the Philippines - Bachelor of Science in Electrical Engineering, Electrical Engineering — Manila, Philippines

2013 - 2017

SKILLS

- Protection Relays
- ETAP
- Fault Analysis
- Substation Systems
- SCADA
- Relay Coordination
- High Voltage Systems
