Jericho Santos

Antenna Design Engineer

Email: jsantos@email.com **Phone:** (63) 917-884-1184 **Location:** Taguig, Philippines

SUMMARY

Highly focused and innovative Antenna Design Engineer specializing in electromagnetic simulation, RF architecture prototyping, and complex signal verification models. Adept at employing specialized industrial software environments like HFSS and CST to engineer high-efficiency PCB antennas and communication subsystems, ensuring robust alignment with LTE and next-generation 5G wireless network benchmarks.

WORK EXPERIENCE

Antenna Design Engineer

Jan 2021 – Apr 2026

Huawei Technologies Philippines

Taguig, Philippines

- Designed and tested antennas for wireless communication and networking systems.
- Performed electromagnetic simulations and antenna performance analysis.
- Improved antenna efficiency through optimized design parameters and testing.

RF Design Intern

Jul 2019 – Dec 2020

Ericsson Philippines

Makati, Philippines

- Assisted in antenna testing and RF measurement activities.
- Prepared simulation reports and technical design documentation.
- Supported prototype development and laboratory testing procedures.

SKILLS

- **Antenna Design**
- **RF Simulation**
- **Electromagnetic Analysis**
- **Signal Testing**
- **Wireless Communication Standards (e.g., LTE, 5G)**
- **Electromagnetic Simulation (CST, HFSS)**
- **PCB Antenna Design**
- **Technical Documentation**

EDUCATION

Bachelor of Science in Electronics Engineering

2015 – 2019

Wireless Communication Engineering Specialization

University of Santo Tomas

Manila, Philippines
