Kevin Aquino

Semiconductor Process Engineer

Email: kaquino@email.com **Phone:** (63) 919-552-6641 **Location:** Cavite, Philippines

SUMMARY

Highly analytic and performance-driven Semiconductor Process Engineer with foundational and technical expertise in modern silicon manufacturing environments. Competent in supervising high-yield wafer fabrication, standard process calibration nodes, defect reductions, and systematic failure engineering analysis. Proficient in optimizing production line workflows to reach top-tier quality benchmarks while implementing sustainable root-cause correction parameters.

WORK EXPERIENCE

Semiconductor Process Engineer

Jan 2021 – Apr 2026

Intel Philippines

Cavite, Philippines

- Monitored semiconductor manufacturing processes to ensure product quality and yield performance.
- Reduced production defects through process optimization and equipment calibration.
- Conducted failure analysis and root cause investigations for process issues.

Process Engineering Assistant

Jul 2019 – Dec 2020

ON Semiconductor Philippines

Cavite, Philippines

- Assisted in wafer processing and production monitoring activities.
- Maintained process control documentation and inspection records.
- Supported equipment troubleshooting and preventive maintenance tasks.

SKILLS

- **Semiconductor Processing**
- **Wafer Fabrication**
- **Process Optimization**
- **Failure Analysis**
- **Yield Improvement**
- **Equipment Calibration**
- **Root Cause Analysis**
- **Quality Control**

EDUCATION

Bachelor of Science in Electronics Engineering

Semiconductor Engineering Specialization

2015 – 2019

Technological University of the Philippines

Manila, Philippines
