# Miguel Santos

## Power Systems Engineer

msantos@email.com ✉
(63) 917-201-3345 📞
Quezon City, Philippines 📍

Power systems engineer specializing in transmission planning and grid stability analysis. Experienced in power flow modeling, fault studies, and renewable integration. Strong background in utility-scale systems with focus on reliability optimization and infrastructure resilience.

## Work Experience

### NGCP – Power Systems Engineer

Quezon City, Philippines

Jan 2021 - current

- Performed load flow and short circuit analysis for 220kV transmission upgrades.
- Improved system stability margins by 18% through reactive power optimization.
- Coordinated outage planning for grid maintenance affecting 100k+ consumers.

### Energy Development Corporation – Junior Power Engineer

Makati, Philippines

Jan 2019 - Dec 2020

- Assisted in power system simulations using ETAP and DIgSILENT.
- Supported substation commissioning activities for geothermal plants.
- Prepared technical reports for system reliability assessments.

## Education

### University of the Philippines Diliman – Bachelor of Science in Electrical Engineering, Electrical Engineering

Quezon City, Philippines

2015 - 2019

## Skills

- Power Systems Analysis
- ETAP
- DIgSILENT PowerFactory
- SCADA
- Electrical Protection
- Grid Planning
- MATLAB
