WORK EXPERIENCE

DevOps Engineer

Voyager Innovations

Aug 2022 - current Taguig, PH

- Built CI/CD pipelines in GitHub Actions for 15+ microservices, cutting release cycle to daily.
- Containerized 20 legacy apps using Docker and Helm, reducing infrastructure costs by 22%.
- Set up Prometheus and Grafana dashboards, improving incident detection by 45%.

Systems Administrator

Cloudstaff Philippines

Jun 2021 - Jul 2022 Angeles, PH

- Maintained 60+ Linux VMs with 99.95% uptime across client environments.
- Automated patch management with Ansible, saving 12 sysadmin hours per week.
- Onboarded 5 new client environments, configuring network, storage, and access control.

IT Infrastructure Intern

Globe Telecom

Jan 2021 - May 2021 Taguig, PH

- Deployed test environments for 3 internal applications using VirtualBox and Linux.
- Wrote shell scripts automating log rotation and disk usage alerts for 10 monitored servers.
- Shadowed senior engineers during live incident drills, documenting runbook procedures.
