WORK EXPERIENCE

Lead Software Engineer

Comcast

2022 - current Philadelphia, PA

- Architected backend services supporting customer account and billing platforms, enabling processing of ~19k account activity events daily across subscription systems.
- Optimized high-traffic service endpoints in Java, ***reducing average request latency by 36%*** during peak customer usage periods.
- Implemented automated integration testing within CI pipelines, strengthening release validation across 11 critical application modules.
- Guided cross-team engineering efforts with product and infrastructure groups to deliver platform updates on a bi-weekly release cadence.

Software Engineer

Appian

2020 - 2022 Philadelphia, PA

- Developed workflow automation features for enterprise process management platforms, enabling organizations to orchestrate 140+ automated business processes.
- Refactored backend logic using Java, ***shortening workflow execution time by 24 minutes*** per processing cycle for client deployments.
- Integrated RESTful APIs connecting workflow services with 4 external enterprise applications used by client operations teams.
- Collaborated with product and QA teams to deliver platform enhancements that improved internal usability scores to 4.6 / 5 during release reviews.

Technical Support Engineer

UPMC

2018 - 2020 Pittsburgh, PA

- Resolved technical support issues involving clinical software, workstation configuration, and network access, ***maintaining 94% first-contact resolution*** for hospital staff requests.
- Diagnosed recurring system and connectivity problems across healthcare workstations, reducing average troubleshooting time by 18 minutes per ticket.
- Maintained troubleshooting documentation and support procedures used by 9 help desk technicians during onboarding and daily operations.
- Assisted clinicians and administrative staff with account provisioning and application access, handling ~52 support requests weekly while meeting SLA response targets.

EDUCATION

Master of Science
Software Engineering
Carnegie Mellon University
2018 - 2020
Pittsburgh, PA

Bachelor of Science
Computer Science
Carnegie Mellon University
2013 - 2017
Pittsburgh, PA

SKILLS

- Java
- REST API Development
- CI/CD & Automated Testing
- Enterprise Workflow Automation
- Technical Leadership
- Cross-Functional Collaboration
- Analytical Problem Solving
- Customer-Focused Communication
