SKILLS

Documentation & Knowledge Sharing

CAREER OBJECTIVE

Passionate software engineer intern with project experience designing a mobile application design and POS-based smart contract development, aspiring to bring my expertise to Tableau Software. Excited to apply my skills in your firm to drive innovative data visualization solutions.

WORK EXPERIENCE

Customer Service Representative

T-Mobile

2025 - current / Seattle, WA

- Assisted customers with mobile service inquiries, billing questions, and device troubleshooting, supporting 120+ customer interactions weekly through phone and chat channels.
- Resolved account and connectivity issues during live support sessions, ***lowering average call resolution time by 14 minutes*** per case.
- Maintained detailed service records and escalation notes across 3 internal support platforms, improving continuity for follow-up cases.
- Collaborated with technical and billing teams to address complex service requests, contributing to 4.5 / 5 customer satisfaction ratings during quarterly reviews.

PROJECTS

PixelPilot

UI/UX Designer

2024 - 2025

- Designed a mobile-first interface for a productivity tracking application, organizing 18 interactive screens for user onboarding, task management, and progress tracking.
- Conducted usability testing sessions with 12 participants, identifying navigation friction points that ***improved task completion time by 26 seconds***.
- Created interactive prototypes using Figma, enabling iterative design feedback before development handoff.
- Presented final design solutions during monthly project review meetings, documenting accessibility and layout improvements.

Blockchain

Seminar Attendee

November 2023

- Participated in technical sessions exploring distributed ledger concepts across 7 blockchain architecture topics including consensus models and smart contracts.
- Analyzed real-world blockchain implementation case studies, ***reducing average concept comprehension time to under 40 minutes*** per workshop exercise.
- Reviewed blockchain security practices and cryptographic fundamentals using Ethereum development tools during guided lab exercises.
- Compiled post-seminar notes and technical summaries that supported quarterly knowledge-sharing discussions with peer developers.
