WORK EXPERIENCE

Amazon – Amazon Software Engineer

2023 - current Philadelphia, PA

- Engineered backend services supporting order fulfillment and logistics coordination, enabling processing of ~17k order status events daily across distributed retail systems.
- Optimized service-layer data retrieval in Java, ***lowering average request latency by 35%*** during high-volume shopping periods.
- Implemented automated validation checks across 8 microservice components, strengthening data consistency between inventory and fulfillment systems.
- Collaborated with product and infrastructure teams to deliver platform enhancements on a two-week sprint cadence.

Duolingo – Software Developer

2020 - 2023 Pittsburgh, PA

- Developed backend features supporting lesson delivery and progress tracking, enabling management of 140+ course modules across multiple language programs.
- Refactored learning data processing pipelines in Python, shortening content synchronization time by 18 minutes per update cycle.
- Integrated RESTful APIs connecting mobile learning apps with 3 internal analytics services used for learner engagement insights.
- Partnered with product and design teams to ***ship feature improvements that increased internal usability scores*** to 4.6 / 5 during release reviews.

BNY Mellon – Junior Software Developer

2017 - 2020 Pittsburgh, PA

- Built internal tools supporting financial reporting workflows, enabling analysts to manage 95+ daily transaction records through a centralized interface.
- Automated recurring data preparation scripts in Python, ***reducing manual reporting effort by ~4 hours weekly*** for finance teams.
- Investigated discrepancies in financial data pipelines, resolving issues affecting three external market data integrations.
- Documented development workflows and deployment procedures that shortened onboarding time for new developers by one training cycle.

EDUCATION

Carnegie Mellon University – Bachelor of Science, Computer Science

2013 - 2017 Pittsburgh, PA

SKILLS

Java; Python; REST API Development; Microservices Architecture; Cross-Functional Collaboration; Analytical Problem Solving; Agile Development; Technical Documentation
