WORK EXPERIENCE

Front End Software Engineer

Asana

2021 - current San Francisco, CA

- Created responsive web designs using HTML5, reducing Asana's main website load time by 1.2 seconds.
- Optimized front-end build processes with Webpack, **achieving a 2-week decrease in build time**, leading to faster deployment cycles.
- Automated front-end testing with the help of Jest, growing average unit test coverage from 89% to 95%.
- Collaborated on the migration of legacy code to modern JavaScript frameworks, transitioning 172K+ lines of code to React.js.

IT Support Specialist

Slack

2018 - 2021 San Francisco, CA

- Assisted in redesigning Slack's landing pages on Bootstrap, increasing mobile user engagement rates by 26% within two months.
- Developed a custom Gulp plugin to automate digital asset optimization, directly improving the main website's annual SEO rankings.
- Integrated Sass functions into the development workflow, enabling concise styling features that helped developers use variables and complete front-end code 2 days quicker.
- Conducted A/B testing on multiple front-end designs, which helped the team find an **8% rise in positive feedback** for the tested features as per feedback emails.

Technical Support Specialist

Dropbox

2017 - 2018 San Francisco, CA

- **Maintained 39 batch scripts using Git** to automate routine backup and sync tasks, allowing senior engineers to complete 4 more tasks every day.
- Authored a detailed npm package guideline document, cutting down compatibility issues across 2 development environments.
- Used automated error tracking and resolution processes, lowering annual reported downtime incidents by 11%.
- Held 14 tech talks on the effective use of Visual Studio Code, helping interns learn how to enhance their overall code quality.
