- Agile Development
- Technical Documentation

WORK EXPERIENCE

Java Software Engineer

DraftKings

2023 - current Boston, MA

- Engineered backend services powering betting and contest workflows, enabling sportsbook systems to process ~14k wager events daily during peak sporting events.
- Optimized transactional data access layers in Java, ***lowering average bet confirmation latency*** by 33% across high-traffic game windows.
- Implemented validation logic for wager settlement pipelines, strengthening data integrity across 6 financial processing modules used by accounting systems.
- Collaborated with product, compliance, and infrastructure teams to release sportsbook feature updates on a two-week sprint cadence.

Full-Stack Developer

Akamai Technologies

2020 - 2023 Cambridge, MA

- Developed customer-facing dashboards for edge performance analytics, enabling enterprise clients to monitor 180+ active delivery configurations through a unified interface.
- Refactored API integration layers connecting frontend dashboards to backend telemetry services, reducing average data retrieval time by 21 seconds per query.
- Integrated dynamic UI components using React, ***improving real-time visualization of CDN performance metrics*** across 4 internal analytics tools.
- Partnered with platform and product teams to deliver incremental interface improvements that raised internal usability scores to 4.7 / 5.

Junior Software Developer

HubSpot

2018 - 2020 Cambridge, MA

- Built internal tools supporting CRM campaign management, enabling marketing teams to organize 95+ client outreach workflows within a centralized dashboard.
- Automated data transformation scripts in Python, decreasing manual report preparation by ~4 hours weekly for the marketing analytics team.
- Investigated discrepancies in campaign tracking pipelines, resolving issues affecting three customer reporting integrations.
- Documented onboarding guides and development workflows that ***shortened ramp-up time for new junior developers*** by one training cycle.
